

# **AQUA REPUBLICA**

## **About the Game**

Aqua Republica is a simulator strategy game about water management.

In Aqua Republica your task is to develop a sustainable settlement, cities, power plants, industries and farms all need water, so your main purpose should be to make sure that enough water is available for them to function.

This mission will take you through the very basics of managing your river basin successfully.

You will learn about constructing new buildings, implementing new policies and structures within a building.

## **Rules**

- i) 1 hour time will be given to develop the settlement.
- ii) Maximum of 2 members is allowed per team.
- iii) Team scoring maximum points in given time will be the winner.
