

WINK MURDER

“CATCH THE KILLER OR GET KILLED”

1. Each round of the game consists of 10 players or more. The game is to be played in complete silence and only eye contact between the players is allowed.
2. The game will start with the assignment of roles to each player via chits provided by the game moderator. The roles of the players are as following-

Murderer - The murderer role will be assigned to two players in the group who can “kill” other players and he/she can do this by blinking/ winking at the victim. The victim killed has to quietly move out of the circle when killed without uttering a single word.

Victims - Every person other than the murderer is a victim in this game and the victims have to survive by catching the killer. They can suspect anyone to be the killer and then raise their hand. The victims can't say anything when they are killed and are eliminated immediately.

3. The game starts with the killer killing his/her first victim.
4. The remaining victims now have the opportunity to raise their suspicion about the person they think is the killer. The victims who are sure about who the killer is raise their hand and wait for a second victim to suspect. And when the second victim suspects, both the victims will be asked to point out the killer in the group at the same time.
5. Both the victims who suspect have to point out the same person and it turns out to be the killer then the killer is eliminated and the game restarts. If the person pointed out by the victim is not the killer then he/she will be eliminated and the game restarts.
6. During a round when the number of people reduce to 5 there will be only 1 killer.
7. This continues until only 3 people are left in the group and these 3 will move to the next round.
8. **In the final round there will be only 1 killer and 7 or 9 victims.**

The amount of players in the game depends upon the registrations taking place and there could be 8-10 players in one group.

Venue: Old CRC Lawns

Registration Fees : Rs 30 per person
